A Triumph of Engineering Genius!

UNDERLYING the smart styling of Pontiac's Fisher-built bodies, you will find the master touches of skilled craftsmen and designers . . . the unmistakable evidence of engineering excellence.

The big, husky Pontiac Six engine—with its GMR "blue-truck" cylinder head, its crankcase ventilation system, its oil filter, air-cleaner, etc. . . is the result of the skill and experience of Pontiac engineers, plus General Motors' great engineering and research laboratories!

The fuel-pump system (replacing the vacuum-tank) . . . the Loveloy Shock Absorbers . . . the sure acting mechanical Four Wheel Brakes . . . these too are developments of Pontiac plus General Motors. General Motors' resources make Pontiac Six a triumph of engineering genius, just as they make it a revelation of six-cylinder value.

Ask your dealer about the G.M.A.C. Deferred Payment Plan which makes buying easy.

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

LEGAL NOTICE

MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by The Land Title Act under a certain mortgage which will be produced at the time of the sale, there will be offered for sale by public auction at the Post Office in the Village of Oyen in the Province of Alberta on Saturday the 26th day of May, 1928, at the hour of 2 o'clock in the afternoon, the following property, namely:

The North East Quarter of Section Fourteen (14) in Township Twenty-eight (28) and Range Four (4) West of the Fourth Meridian, reserving to the Crown all mines and minerals and the right to work the same.

Terms of sale to be twenty per cent cash at the time of sale and the balance according to the terms and conditions to be made known at the time of the sale upon application to the vendor's solicitors.

The above property was offered for sale subject to a sealed envelope bid and free from all encumbrances, save taxes for the current year.

The vendor is informed that the above property is situated about 3 miles from the Village of Oyen and that 160 acres are under cultivation.

For further particulars and conditions of sale, apply to:
Thomas Lewis, Oyen, Alberta.
Dated this 20th day of March, A.D. 1928.

Approved 'W. Forbes' Registrar.

LEGAL NOTICE

MUNICIPAL DISTRICT OF BERTWAIN, No. 271

NOTICE IS HEREBY GIVEN that, under the provisions of The Tax Recovery Act, 1922, and amendments thereto, the following described lands will be offered for sale, by public auction at the Municipal Office, in the Municipality of Bertwain, in the Province of Alberta, on Saturday, May 12th, 1928, at 2 o'clock p.m.:

DATED at Sibbald, this 15th day of March, 1928.

W. LINKLATER,
Secretary-Treasurer.

Here and There

(22) Quebec—When the 1928 ship-plant season opened here April 22, the Canadian Pacific Steam Lines fleet applied fifty per cent of the steamer that docked at the Montreale, Montreal and Saguenay wharves. The fleet consisted of 2300 tonnage, about 1000 of which were in the West.

International Advertising Convention and bazaar will be held at Detroit, July 8-12, is already attracting wide notice and will contain under one roof everything relating to organized advertising in every phase. Advertising men from overseas will attend and business is being made on Canadian Pacific liners from Great Britain and Europe will abound of this view of the large demand for travel that will arise.

Thirty-five miles of salmon fishing in the Caledon River, New Brunswick, were enjoyed recently by five anglers from Chicago and the U. S. Middle West and by a party of New York newspapermen, including W. McClellan, International known New York Herald-Tribune sports writer. Both parties were staying for about a fortnight in the care of Harry Allen, well known New Brunswick guide. They travelled Canadian Pacific to their fishing destination.

Okanagan.—Word is received from Washington that the Okanagan project, during the last year, had a higher per acre yield of apples and a consequently higher acre return to the grower, than any government irrigation project in the United States. The local project, with 3,567 acres in apples, has a yield of \$5,145,759 pounds, or 8,882 pounds to the acre, a yield which brought the growers a return of \$1,025,854, or the high record price of \$289 an acre. On the Yakima project the average yield was 8,602 pounds to the acre or at rate of \$244.16 per acre. The nearest approach to the Washington record was on the Ben river project in Montana, where the average was \$13,321 an acre, followed by the Boise project, with a price of \$148.

Ottawa.—The Department of Agriculture has issued a report showing how the Canadian "looly" plane is combating wheat rust—how the Canadian Air Force, the Federal Department of Agriculture and the pathological plant at the Manitoba Agricultural College at Winnipeg are uniting to fight the enemy. The report says: "The work consists mainly in the exposure of slides at different altitudes and at different locations. These aeroplane exposures attempt to collect from altitudes of from 1,000 to 5,000 feet the date of the earliest appearance of rust spores, the region over which they first appear, the rate at which the spore content of the air increases over various regions, the visibility of spores caught at these higher altitudes and the relation of general environmental and climatic factors to the rate of development and spread of rust. Flycatcher stoppers are used, containing wooden paddles to which are attached microscopic slides lightly smeared with vaseline. These slides are exposed for 15 minutes at varying altitudes; the slides replaced in the bottles and then returned to the Government laboratory at Winnipeg."

STYLE

Look at your HAT

Everybody else does
The best solution is to drop in here at your leisure and we will fit you with a new Billmore.
Not expensive either.

New Suits
Fancy brown wools. Real value at \$30.00.

Ballantyne Sweaters, in jerseys, fine wool coats etc. \$1.75 to 3.50.

Don't forget—for a built-to-measure suit, visit our store Thursday, May 17. Mr. Collins of The 'House of Hobberlin' will be with us that day and will be pleased to measure you and help you select a suitable pattern. Hobberlin Clothes are built for style and service and cost of wear per day is small.

C.N.R. ESTIMATES ARE APPROVED BY COMMERCE

Ottawa.—In its final report tabled in the House, the special railway committee of the House of Commons estimates of the Canadian National Railway and Canadian Government Maritime. The report approved the reductions in freight rates, increase in wages, late crop conditions and larger expenditure on maintenance of way and structures are taken into account, the result of the operations of the railway for the past year "are very satisfactory indeed."

The committee is satisfied from the evidence given that the accounts, prepared for the year are in accordance with the prescribed practice in rail read accounting and accurately reflect the revenues received and expenditures made during the period.

The committee is further of the opinion that the amounts of \$39,000,000 asked for the year 1927, and of \$7,000,000 asked for the Canadian Government Merchant Marine, are necessary and should be passed by the House.

The committee struck a snag in its deliberations, and sat well after the usual hour of adjournment.

Sir Henry Thornton, president of the Canadian National, and Hon. H. H. Stevens differed sharply over the manner in which Canadian National accounts are presented.

Since the passage of the Maritime Freight Rates Act, the rates of operations on the Eastern Lines have been published separately from that of the Canadian National Lines. Mr. Stevens held that the Canadian Maritime Freight Rates act as the rates of Eastern lines had to be incorporated, the result being that the rates in the main report. "The accounts as presented," Mr. Stevens declared, "do not give the whole situation fairly and accurately."

Sir Henry Thornton differed. He said that the board of directors of the Canadian National had followed what they believed to be the requirements of the Canadian National. He held that it would be unjust and unfair that the Canadian National should have to include in the operating results of the system the deficits of the Western Lines brought about by freight reductions under the Maritime Freight Rates Act.

The report was not adopted till after two and a half hour's discussion.

Grants Will Be Discontinued

Federal Assistance For Vocational Training Ends With Fiscal Year

Ottawa.—The grants of the Dominion Government to technical education will be discontinued at the end of one present fiscal year, Premier Mackenzie King told a large delegation which waited on the Government to urge that the federal assistance be continued.

The grants were begun in 1919, and the act provided that they had been late in starting vocational training and therefore had not been the full benefit of the grants the act provided, these being allowed prior time.

Would Follow Canada's Example

London.—Sir Hugh R. Denison, former commissioner for Australia in the United States, strongly urges the Commonwealth government to follow the example of the Canadian government in having a legation in Washington, according to The Sydney Telegraph correspondent at Sydney, Australia.

Nurses Will Meet in Winnipeg

Montreal.—Winnipeg will be the scene of the convention of the Canadian National Association of Nurses during July, here by Miss Edith Both, secretary-treasurer of the public health section of the association.

Calgary.—Margaret Kinney, of Edmonton, won the Alberta oratorical championship over Alberta, Calgary, The Calgary Herald.

Justice Harvey, Mr. Justice Twiss and Bishop L. B. Sherman, Hon. Percen Baker, Minister of Education presided.

Think British Envoy Should Be Canadian

British Labor M.P. Suggests Dominion Consul For Post At Washington

LONDON.—Appointment of a Canadian as principal representative of Great Britain at Washington is a suggestion made in a book, "The Freedom of the Seas," just published by Mr. L. C. Brown, M.P. for London, M.P. and George Young, an attaché to the late Lord Bryce, in the British embassy at Washington.

Referring to the naval differences between the two countries the authors state that in their belief the conflict of policies can be reconciled. They continue:

"There is now a new diplomatic channel and democratic contact in the Canadian diplomatic representative and his staff at Washington. Canada is a bond for peace between the United States and Great Britain and her mission in Washington might become a bridge for political confidence and co-operation."

"We might indeed do worse than persuade the Canadian Government to release an important citizen of the Dominion to represent England at the Empire at Washington when next there is a vacancy at the British embassy, and let the foreign office be represented by the official who would be a junior to the representative."

Gen Currie Receives Verdict

Jury Finds Article Criticizing Sir Arthur Was Libelous

Cobourg, Ont.—By a poll of eleven to one, a civilian jury rendered a verdict in the case of the late Sir Arthur Currie, M.P., against the publisher of the article which appeared on June 13, 1927, in the Port Hope Guide, entitled "Monsieur," and against the publisher of the paper, F. W. Wilson. The jury, after four hours' deliberation, found that publication of this article was libelous and they awarded General Sir Arthur Currie, who was the aggrieved party in the suit, damages in the sum of \$500.

The former commander of the Canadian corps had claimed \$50,000. The trial opened on April 16, in the city which closed the campaign in Cobourg before Mr. Justice Rose and the jury, the hearing of evidence and the closing of the case lasted only 14 days. During the course of the testimony the events of the stirring days which closed the campaign in Belgium and France, were gone over by the evidence of witnesses, including number whose names have become famous for deeds of gallantry and heroic leadership.

Sir Arthur was represented by W. N. Tilley, K.C., Toronto, and F. W. Wilson by Frank Rogers, K.C., Toronto.

Commencing Work On

Peace River Highways

Alberta Ministers Must Inspect Road Over Proposed Route

Edmonton.—Hon. O. L. McPherson and J. D. Robertson, minister and deputy minister of public works, have returned from an inspection trip over the proposed route of the Peace River Highways. They went as far north as High Prairie, visiting a number of points where road construction details required decision before the season's work begins.

The North is to be commenced at once and will be pushed forward as rapidly as conditions will permit during the spring and summer. A working crew has already made camp in the Peace River valley, where a considerable amount of clearing is to be done for the new road.

Mr. McPherson is hopeful of better conditions than last year, which in turn will make possible a better construction record for the season.

Starts On Long Trip

Chicago.—The job of putting the rotary club on "main street" in Jerusalem, Constantinople, Cairo, and the cities of the Orient, has been given to James Davidson, of Calgary, Alta., who has started a seven months trip.

Mr. Davidson is a past vice-president of Rotary International. His itinerary includes Manchester, England; Paris, France; Indo-China, Siam, India, Arabia, Egypt, Palestine, Turkey and Greece.

Summer Course For Teachers

Saskatoon.—The twelfth session of the summer school for teachers will open at the University of Saskatchewan on July 31. It is designed to afford teachers an opportunity to study for higher professional standing and also to receive special instruction in certain subjects on the public and high school courses of study.

Leaves Life Job In Canton

Former Edmonton Man Was Bodyguard For Late Mr. Sun Yat Sen

Canton.—Morris Cohen, famous bodyguard man from Canada, who served the late Mr. Sun Yat Sen as bodyguard for the last three years of the revolutionary leader's life, has left Canton for an unnamed destination.

Of the polyglot coterie of foreigners who assembled about Dr. Sun's life in Canton—Rods, Russians, Americans, Germans—this busy, free-handed Jewish adventurer is believed to have been the last of any prominence remaining in China. He turned up here six years ago when he left Canton for a period of revolutionary Chinese in Edmonton, Alta., whence Cohen hailed.

When the Kuomintang leader died in 1925, his will stipulated that Cohen should have a life job in the Canton Government's central bank. This he held, until he was discharged for not purchasing arms for Canton officials, until he became involved in the flood uprising of last December. The upshot was his purchase of a one-way ticket from the scene of his six-year phase of his adventurous career.

Radium Specialist Martyr To Science

Has Lost Left Hand But Will Continue His Work

Paris.—For the tenth time in two years Henri Becquerel, radium specialist, who is now in the hospital, Paris, has submitted to the amputation of a finger joint. His right hand is still intact, but ten operations have cut out the fingers of his left hand. The doctor who performs the operation is responsible. His hip also is affected. Physicians have warned Mr. Becquerel that his independence will be curtailed, but the radiologist's answer is: "My comrades in the war made greater sacrifices for humanity."

EGYPT MUST REMAIN UNDER BRITISH CONTROL

LONDON.—"I think the interests of Great Britain in Egypt make it impossible to contemplate the occupation of Egypt by any other power than ourselves," Sir Austen Chamberlain, British foreign secretary, asserted in the House of Commons after making public Britain's reply to the Egyptian government's note announcing its intention not to proceed with this session with the assemblies till such time as British troops have been withdrawn.

The Egyptian note dispelled for the time being at least the crisis brought about by the Egyptian government's intention to enact the measure and also resulted in the countermarching of instructions which had previously been thought necessary to give to certain British warships.

"It will always be necessary," Sir Austen Chamberlain said, "to maintain the principles of the declaration of 1922 and as we forbid other powers to interfere we must also take measures to secure the safety of cities of those powers as well as our own nationals."

The foreign secretary's statement came in answer to a question by Mr. Thorne, Labor, Paisley, who enquired whether Sir Austen thought the declaration of 1922 would stand for ever.

London-India Air Service

Croydon, Eng.—Speaking at the official opening of the Empire Airways Aerodrome, Sir Samuel Hoare, British air minister, said he had approved the outline of an agreement between the Government and the Imperial Airways for a regular weekly air service between London and India.

FAMOUS CANADIAN EMPIRE

London.—The famous Canadian Empire archipelago, the Arctic archipelago, has been in and out of the straits a score of times without the least mishap. At 76, this iron ship, who came over from the woods to the iron ships, is a physical marvel and is far from having made its last entry in its log book.

Successful Polar Flight

Washington, D.C.—The crew of the Bremen was welcomed to Washington as pioneers whose feat symbolized the ever-narrowing distance between the east and west.

Coming by train in the early hours of the morning, the German-British flight accompanied the first non-stop flight of an airplane over the North Atlantic in the east, received the Secretary of State Frank B. Kellogg's greetings of the nation to supplement the tumultuous welcome they were given in New York City.

The three fliers, Vice Admiral Hunsfeldt, Fritzsche and Koeck, were greeted as men who had marked another milestone in the path of man's conquest over the forces of nature.

After Secretary Kellogg had greeted them Ambassador Von Pitzinger, German minister, Hon. Harold Smith, minister of the Irish Free State, stepped forward to offer welcome.

Prominent among those participating in the welcoming ceremonies was Col. C. A. Lindbergh and Eddie Rickenbacker, the U.S. war ace.

Later in the day the Bremen trio received from President Coolidge the distinguished flying crosses awarded them by Congress.

Prepare For Night Flying

Reasons Have Been Ordered For Canadian Air Route

Ottawa.—Night flying will soon be a factor in aviation in Canada, according to plans being formulated by the civil aviation branch, department of national defence, for the first lighted airway in the Dominion, says the Ottawa Journal.

Tenders it is understood are to be called for by the government for five giant beacon lights to be placed at intervals of 25 miles along the north shore of the St. Lawrence River on the air route from St. Hubert northeast to Lewisville, Ontario.

The plan will form a great part of the air mail route from Rimouski to inland points, which opened for the season on May 6.

CLAIM EXPLANATION DOES NOT SATISFY BRITISH

Invasion Of West Indies Ports By U.S. Anti-Smuggling Ships Being Discussed

Washington, D.C.—The controversy between the British and United States departments over violations by the United States prohibition enforcement staff of the Bahamas agreement probably will be carried to President Coolidge by J. S. Duggan, chief commissioner of immigration, Canadian Pacific Railway.

The records of his company showed a decrease of 40 per cent in British newcomers for the four months of this year, as compared with a similar period in 1927. Col. Dennis stated that a system of inspection of immigrants on the other side by roster doctors, under the supervision of a small body of Canadian doctors, would be very preferable to the new system of inspection by Canadian doctors only at British ports, he continued.

Col. J. Stubbard, British army representative, admitted a system of training soldiers in agricultural work for a period of six months prior to their discharge from the British army. About 55,000 soldiers were discharged annually in England. A number of them were available afterwards for agricultural employment in Australia, New Zealand, and other countries. He desired a guarantee of one year's employment on arrival.

Col. Dennis refused to examine Canadian conditions which he would place before these agricultural training soldiers.

London.—While the assisted passage rates for migration to Canada are low, the restrictions on migration for so-called "undesirable" persons by the committee states in its annual report, published recently.

The rule states that persons who have settled down to any other occupation than that of agriculture are not allowed to nominate family members for passage to the Dominion is pointed out as one of the restrictions.

The committee expressed the opinion that the law should be modified to mutual advantage and he voiced that the nomination of persons for migration should be modified to enable persons to enter other occupations besides farm work.

WHEAT POOL CONFERENCE TO BE HELD IN JUNE

Winnipeg.—Co-operative marketing associations engaged in marketing wheat, dairy products, wool, poultry, etc., as well as representatives of consumer co-operatives, will take part in the first international wheat pool conference to be held in Winnipeg on June 5, 6 and 7, it was announced by C. H. Burnard, president of the Wheat pool committee, after an all-day session in the Manitoba Wheat Pool office.

Mr. Burnard received word that the Scottish Co-operative Wholesale Society will be represented by John Calder and Peter Malcolm, directors, and William Smith, commercial manager and wheat buyer, as well as Mr. J. H. Fisher, of Winnipeg, Canadian manager, and the English Co-operative Wholesale Society by A. W. Gough and J. O. Oliver, directors of the English central wheat buyer.

Sir Thomas Allen is expected to be a member of the British Empire Marketing Board, International Co-operative Alliance has called that he will be present.

The Australian Wheat Pool are sending two representatives, C. J. Cook and J. H. Hinkins of the South Australia Farmers' Co-operative Society.

It is expected that Russian Co-operative Marketing Societies will be represented by several delegates.

The Australian government and the International Institute of Agriculture will have special representatives at the conference. A number of prominent officials from the United States department of agriculture as well as representatives of a number of the large co-operative organizations in Canada are to delegate and officials of the United States wheat pools will be present.

Among those who have promised to attend are Judge John D. Miller, vice-president and general counsel of the Dairyman's League and president of the National Co-operative Milk Producers Federation, New York City; John Brandt, president of the Land O'Lakes Creamery, Minneapolis; Ralph D. Merritt, managing director of the Sun-Maid Raisin Growers, Fresno, California; J. B. Brown, general manager of the Central Co-operative Association, St. Paul; F. M. Black, chairman of the Interior True Fruit and Vegetable committee of direction, Kelowna, B.C.

Hon. W. R. McRae, minister of agriculture for Canada; Hon. J. E. Brownlee, premier of Alberta; Hon. J. G. Gardiner, premier of Saskatchewan; and Hon. R. A. Hoey, who is representing the Manitoba Government, will be among the speakers.

CLAIM SETTLERS ARE BARRED BY INSPECTION

Ottawa.—"Canada is receiving a decreased number of British immigrants owing to the new machine inspection system." This assertion was made at session of the House Immigration Committee by J. S. Duggan, chief commissioner of immigration, Canadian Pacific Railway.

The records of his company showed a decrease of 40 per cent in British newcomers for the four months of this year, as compared with a similar period in 1927. Col. Dennis stated that a system of inspection of immigrants on the other side by roster doctors, under the supervision of a small body of Canadian doctors, would be very preferable to the new system of inspection by Canadian doctors only at British ports, he continued.

Greatness Of The Wheat Pool

Has changed the Whole Economic Situation, and Given the Farmer Confidence

The wheat pools are today "Canada's greatest industries in point of annual turnover excepting the transcontinental railways," declared R. J. Caldwell, M.P. for New River, Alta., in an address before a local service club in Montreal.

"There are the only things that exceed in value of business," he continued. "We obtain greater success from wheat than any other commodity in the Dominion, and this, while wheat is measured, that while wheat is measured by the 'little white'."

The cost of operation, the total cost to us of the wheat pool was one-fifth of a cent per bushel, for our provincial pool had our total cost of meeting our central selling agency was one-fifth of a cent a bushel.

"Before the pools, the wheat crop was placed on the market at once. We three nearly 200,000 bushels of wheat at the buyer in three months," he said. "Today we distribute it throughout the year, and if there is no demand we don't offer it."

"It is the greatest thing under heaven for us. It has changed the whole aspect, economically and otherwise, and it has given the farmer confidence."

Old Beliefs Are Deceptive

Many Ideas We Have About Animals Are Incorrect

A legend still believed by many people is that the porcupine is able to shoot its quills. The animal is incapable of such a feat, though, if attacked, its quills will pierce the flesh of the attacker and stay there.

Most of us have the idea that a cat can see in the dark. But while a cat can see in light so dim that man is practically blind, no eyes are as keen as theirs in the dark.

Another popular delusion is that canines are fond of creeping into people's ears. This insect's real name should, however, be ear-worm instead of ear-wig, and it is so called because its wings are similar in shape to the human ear.

The lion's face appearance and awe-inspiring roar have given him the title of King of Beasts. Actually, he is neither so large nor so strong as the tiger, and is, on the whole, rather a mean-spirited animal. Lion-cubers assure that the lion is far more easily handled than any of the other big cats, and big game hunters will tell you that the leopard is a more ferocious animal than either lion or tiger.

How Your Mind Works

Best Results Obtained in Mental Work During Late Afternoon and Evening

When we go to bed early, hoping to wake up fresher than usual, we generally seem to wake up drowsier than after a late night.

In fact, the longer and "deeper" we sleep, the more time it takes to recover the results of our sleep. Mental tests show that students averaged a ten per cent, higher score at night than immediately after eight hours' restful sleep.

In the morning when your mind is fresh it is best prepared for a brief sport, but it is too restless to concentrate. As the day wears on the mind is helped to concentrate by fatigue problems that accumulate in the system. They act as mental excitants and the best time for sustained mental work is in late afternoon until midnight or later.

If people had to express all their thoughts in words or keep quiet, conversation would have a lost art.

If listeners would hear good of themselves they should learn to listen.

DISILLUSIONED

"He has already said the names of three women in his sleep, and not one of them was mine!"—Nagels Lustig Welt, Berlin.

W. N. U. 1732

WALKERS NOT ALL HIKERS

Some Astonishing Records Are Made During Day's Work

Not all long distance hikers are springing along the public highways. The housewife picking up toys and mending the daisies, the policeman picking his beat, and the letter carrier on his daily route are not so spectacular, but they accumulate records of their own that are astonishing in the aggregate.

An enterprising investigator for the Boston Traveler found that a housewife walks every year a distance equal to that from Boston to San Francisco. Perhaps the tired business man has a right to his title when it is considered that every three or four weeks he walks farther than from Boston to New York, exclusive of the walking he does outside his office.

An average schoolboy from the daily walking mileage of a diverse group of persons including schoolboys, doctors, waiters, children at play, conductors, policemen, letter carriers, songbirds and songbirds, accumulated the surprising figure of 15,000 steps, or 7 1/2 miles.

A doctor in a hospital walked 13 miles a day, and a mail carrier on his rounds walked 8 miles in a day. A shopper in Boston walked 11 miles in a day, and a mail carrier on his rounds walked 8 miles in a day. A shopper in Boston walked 11 miles in a day, and a mail carrier on his rounds walked 8 miles in a day.

The average school girl hikes 11 1/2 miles in a day about her work and play, while her more active brother usually tops her record by about four miles. A train conductor walked over 100 miles picking up tickets between Boston and Cleveland, but the total was only five miles between Boston and Chicago.

The figures sound even more impressive when piled up by the week. A salesman covered 75 miles in his weekly rounds, a girl in a business office made 57, and a stenographer who rode to and from work still walked 43 miles in the course of a week.

Dancers work in small areas, but their miles mount rapidly. One registered a mile an act in a vaudeville. A chorus girl registered 4 1/2 miles a day and another dancer used up 5 1/2 miles between 8 o'clock and midnight.

Old Chair Exhibited

Was Made For Mother Of Cheops 5,000 Years Ago

Dr. George A. Reisner, of the Boston Museum-Harvard Expedition, has been carrying chair of Queen Hetepheh, the mother of Cheops, builder of the great pyramid, to the museum at Cairo, where it is on exhibition.

Describing the chair, Dr. Reisner said that its case of patterned gold with inlaid solid gold hieroglyphs and its exquisite simplicity reveal the artistic sense of the Egyptian period.

It was about 5,000 years ago that Cheops, the builder of the Great Pyramid, was this chair built for his mother, who was then the greatest lady in the land of Egypt. The Queen sat on a cushion on the floor of the carrying chair with her knees up and her arms resting on the arms of the chair.

The reconstruction of the relic of antiquity required almost two years of careful work by the Boston-Harvard expedition.

In Addition

The lady was unpleasantly stout. She consulted a Harley street doctor, who drew up a dietary for her, ordering her to follow it strictly and report to him in a month.

At the end of the specified time the lady reappeared stoutest than ever. "Are you quite sure, madam, that you ate what I ordered?" asked the bewildered physician. "Everything," answered the patient.

"And nothing else?" "Nothing whatever, doctor, except, of course, my ordinary meals."

Exports Of Canadian Seeds

Canada exported in 1927 seeds valued at \$8,051,388. Flax and clover seeds were the principal varieties exported. The United States bought \$7,280,425 worth of Canada's seeds last year. Small quantities were sold to the British Isles, New Zealand, China, Denmark, France, Japan, Holland, Australia, Sweden, Czechoslovakia and Russia.

SPRING FLOWERING BULBS

Best Time To Plant To Obtain Finest Flowers Is In The Autumn

In the spring of the year when the flowering bulbs are at their best, many of us decide to plant a bed for future years, but when the autumn has arrived when the planting should be done, our spring decision has been forgotten and the planting is overlooked. The growing of such bulbs as tulips, daffodils, and hyacinths is a very simple matter but it does require some knowledge of the culture that should be given and of the difference in varieties. To supply this information the Department of Agriculture at Ottawa has brought out a booklet entitled "Some Flowering Bulbs" covering not only the history and culture of many of the bulbs that succeed in this country, but also the lessons that have been learned in a study of the subject by an experienced horticulturist.

In dealing with the culture of ranunculus, the bulletin, which is number 18, and available at the Publications Branch of the Department, says that the best time to plant to obtain the most flowers is early autumn. The bulbs may be left undisturbed for years in ordinary good loamy soil. Deep planting even to the extent of six inches and three inches apart is recommended with strong bulbs. In a few years there will have multiplied to an extent that will enable one by digging them up and separating them to greatly extend the plantation. The daffodil may be followed in the summer months with annual flowering plants which can easily be planted with a slight working of the soil and the adding of some easily worked in manure. It is the habit of the daffodil to die down. This occurs some weeks after the bloom has faded and gone. The old foliage should, however, not be removed until it has become yellow and unightly in the bed.

His Lucid Interval

A benevolent elderly man employed at his spare time giving addresses to inmates of lunatic asylums. On one occasion, in pursuit of his hobby, he was giving a talk on a popular subject to the same section of one of these institutions. Right in the middle of his address, one of the inmates rose up, and addressing the speaker, said: "Are we obliged to listen to this drivel?"

The lecturer stopped instantly and addressing the chairman, said: "Shall I go on?" "You may proceed," said the latter. "That poor fellow only has one lucid interval every twelve months, and no he is not likely to interrupt again."

The Constitution of the United States has been amended 19 times.

WILL SEEK MUMMIES IN SIBERIAN CAVES

Members of the Stoll-McCracken Siberian Expedition which sails from Prince Rupert to seek mummies reputed to lie in caves of the Altai mountains. Photographs show: Top, left to right, Charles H. Stoll, of New York, who is backing the party, and Harold McCracken, noted outdoor motion picture photographer and leader of the party; Bottom, the Schooner Morrison, which will take the party north, photographed in the port of one of her previous Arctic journeys, and Captain Bob Bartlett, master of the Morrison. The party are now travelling westward over Canadian National lines to Prince Rupert from which port they will sail for the north.

When a man becomes thoroughly contented he has outlived his usefulness.

A barrel of flour requires 4 1/2 bushels of wheat.

Farmers are Shown How To Clean Seed

Saskatchewan Government Forage Crop Cars Pays Visit To Thirty-Four Points

The importance of seed cleaning was demonstrated to more than 3,000 Saskatchewan farmers during the second tour of the provincial government forage crop cars which were operated this spring by means of the co-operation of the Canadian National Railways. Thirty-four points in all were visited and the equipment consisted of one baggage car for seed supply, one baggage car for seed cleaning machinery, a car for staff accommodation and a coach for lecturers. The itinerary covered a large area of north eastern Saskatchewan, working north to Prince Albert, east to Hudson Bay Junction, and finally to Aberdeen. The average attendance of 108 at each stop was much better than last year. The total attendance for the run was 5,676.

No greater appreciation of the four was shown than that which was displayed in the territory lying between Arman and Kelvington, where a large number of "New Canadians" followed the interpreters of the lectures with keenest attention.

The determination this year to carry a seed-cleaning machinery car and to demonstrate seed-cleaning with various types of farming mills, arose out of the seed drill survey conducted by the Dominion Seed Branch during the past two years in the province. Studies taken under this survey revealed the fact that many farmers were actually using seed which graded "rejected" owing to the presence of noxious and other weed seeds, and it was to impress upon those visiting the lecture cars the futility of attempting to get maximum yields from this type of seed that the seed-cleaning car was requested by the provincial government department of agriculture.

More than 14,000 pounds of grass, clover, alfalfa, millet and other approved seeds were sold during the tour. The staff of five lecturers, provided by the government, was transported free by the Canadian National which provided a caretaker as well.

Grows Flowers Without Soil How to raise plants without soil has been discovered by W. F. Gericke, a professor of the University of California, experiment station at Berkeley. In announcing his discovery yesterday, Gericke said "flowers produced by the 'soil-less' method are sturdier and more delicately colored."

Canada's Water Power Is Well Distributed

Means Much To Paper Manufacturing Which Is One Of Foremost Industries

When it is realized that with only 11 per cent. of our known water power resources developed, the Canadian newspaper industry has already obtained the premier position in the world for production, it would seem as if our growth as a great industrial nation is assured as long as we continue to develop our hydro-electric developments. Pulp and paper manufacturing is one of the foremost Canadian industries and with two natural advantages of almost equal power, namely, an abundant supply of growing pulpwood and easily accessible low priced motive power, it has a future of almost unlimited prosperity. The power is there for the taking and the supply of pulpwood is assured for an indefinite time, thanks to the reforestation policies of such companies as the International Paper Company and to the excellent afforestation system now in existence, which are holding the ravages of forest fire in check.

Canada owes her premier advantage and position in the pulp and paper field to the fact that adequate and abundant water power is well distributed among extensive forest reserves so that the mills may be located on the logging water routes in close proximity to the power developments. As it takes practically 100 b.p. to produce one ton of newspaper per day, this great advantage of eliminating expensive long distance transmission lines has enabled the industry to use some of the cheapest power ever generated.—From The Monetary Times.

Rules For Dairymen

Issued By U.S. To Govern Canadian Milk Exports

Certificates of cleanliness and freedom from tuberculous infection in their product issued by the Canadian federal government, must be obtained by Canadian dairymen who intend to export milk and cream into the United States, under the terms of an order issued by the United States government, under which the Lactococcus and Streptococcus will come into effect on the first of June. On that date the temporary permits issued, pending enforcement of the measure, which was passed last year, will become void.

If a man borrows trouble he must expect to pay the highest rate of interest.

Controlling Cereal Smut

Formalin Found To Be The Only Satisfactory Treatment For Seed Grain

At the Rust Research Laboratory, at Winnipeg, tests were made of a number of methods of controlling smut in seed grain. Seed treatments with formalin and some copper carbonate preparations were conducted in co-operation with the Agricultural Stations at Brandon, Manitoba, Indian Head and Scott, Saskatchewan, and Lacombe, Alberta. The tests were made with oats covered with smut spores. Varieties such as Longflow and Leader, both highly susceptible to smut, were used. Of the different preparations tried, formalin was found to be the only one that can be relied upon to destroy smut in oats. The other substances tested reduced the amount of smut, but none gave even fair control. In the use of formalin the spray treatment seemed to be the most satisfactory. The strength of the solution in the former case was 100 parts of formalin to 1,000 parts of water. The grain was turned with the solution was sprayed over the seed with a sprayer such as is used in applying insecticides to grain. After the seed was treated it was very evenly to the dip of the sprayer. The grain was turned with the solution was sprayed over the seed with a sprayer such as is used in applying insecticides to grain. After the seed was treated it was very evenly to the dip of the sprayer.

Scar For Forest Ranger

Finds Porcupine In Tower Making

A porcupine which dined on two sticks of dynamite in a forest fire tower in the Tigha state forest district, Pennsylvania, gave a forest ranger the scare of his life. District Forester Paul H. Mulford, of Wellston, telegraphed the occurrence to H. Lynn Emerick, a bureau chief of the State Department of Forest and Waters.

The ranger was horrified on entering the tower cabin, 60 feet above the ground, to find the porcupine munching dynamite with evident relish.

The ranger made a hasty exit and started down the tower stairs for terror. But his fear increased when he found the porcupine following him.

Fears that the porcupine might fall and his dinner explode did not add to the comfort of the harassed ranger. Emerick informed Mulford that the dynamite would prove more of a menace to the porcupine than it would to those who got in close proximity to the animal.

He said the dynamite would probably poison the porcupine.

Playing Safe

Arrested by his teacher why he had been absent from school the previous day the boy looked uneasy and did not reply.

The schoolmaster insisted, and after a further span the boy, pointing to the note which the teacher had not noticed on the table, "Please, sir, I don't know what's in the note."

Longest and Shortest Names

The visitor to New York with the longest name was Fred Featherstonhaugh, of Toronto, registered at the Hotel Commodore. His last name contains fifteen letters. The visitor on the same day with the shortest name was Vincent K. of Chicago, who was registered at the Roosevelt.

CARD OF THANKS

We sincerely wish to thank the many friends in Glenada and Fairacres community who have shown us so much kindness and sympathy in our sad bereavement.

Mr. and Mrs. William Newman and family.

—That Means "Better Value" for You

THE irresistible attractiveness of the "Bigger and Better" Chevrolet has induced many motorists to part with the cars they were driving long before they intended to do so. Hence we have a fine selection of Used Cars, literally traded in before their time . . . better used cars than we have ever had before. Yet, used cars are now lower in price than they have ever been before . . . which means better value for you, as a glance at these representative cars will show.

Why do without things you can have?

Luxury . . . Comfort . . . Smoothness . . . Performance . . . Roominess . . . Style . . . Beauty . . . The Bigger and Better Chevrolet gives you ALL.

The beauty, style and luxury of modern Fisher bodies. The comfort and easy riding of longer wheelbase, and long semi-elliptic "Shock-absorber" springs. The power, smoothness and dependability of Chevrolet's rugged valve-in-head engine. The safety of positive four-wheel brakes (and extra emergency brake). And added refinements, such as air-cleaner, oil-filter, crankcase breather, VV windshield, indirectly-lighted instrument panel and many others.

Why do without ANY of these things, when you can have them . . . in Chevrolet . . . at the lowest prices in all Chevrolet history? **Chevrolet** The G.M.C. . . . *General Motors' new delivery payment plan affords the most convenient and economical way of buying your Chevrolet on time.*

CHEVROLET

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

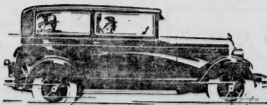

During the last week growth made by trees and shrubs has been unusually rapid. Trees on the village boulevards, with the exception of a few broken down during the winter and early spring by stock, are showing a vigorous and healthy growth.

Mr. William Irvine, who has been confined to his home for the last ten days, is making satisfactory progress and expects to resume his duties as principal of Oyen school, next week. His many friends are pleased to hear of his steady recovery.

About Town and Country

Don't miss the opportunity of seeing "Ben Hur" playing at Oyen Theatre on Thursday, Friday and Saturday, May 10-11-12.

A sale of afternoon tea, home cooking, house and bedding plants, will be held at the home of Mrs. W. D. McPhail, on Saturday afternoon, May 12, under the auspices of All Saints' Women's Guild. 3 p.m. to 5:30 p.m.

Miss Beth Pfeiffer is a guest at the home of Mr. and Mrs. D. E. May. She arrived in Oyen this morning from Alaska.

Mr. W. T. England of Calgary arrived in Oyen yesterday and will spend a few days in the district before returning to Calgary.

Mr. Edward Peck and his bride-to-be Miss Sylvie Macchaut, arrived in Oyen from Guelph, Ont., last Friday.

Mrs. Pratt, on behalf of group 2 Oyen Ladies Aid, wishes to thank the public for their hearty support at the pictures shown under their auspices on Monday and Tuesday evenings. A net amount of over \$100 was realized. Another picture is booked for August when the patronage of the community will be appreciated.

Seeding operations have been carried on steadily during the last week and it is estimated that half the wheat acreage is now in. Some of the early sown wheat is up and looks fine.

Mrs. F. L. Aylesworth received by wire last Friday, the sad news of the death of her mother which occurred on Thursday, May 3, at her home in Cataragui, Ont.

Two local men were fined last week for allowing fires they had started, to get out of control.

B. H. Dial will conduct an auction sale at the farm of Mr. E. L. Squire, 7 miles straight south of Lundre, on Friday May 11. Horses, machinery, harness and household goods. Sale to commence at 2 o'clock in the afternoon.

Miss Mildred Briley, who is operator at Sedalia telephone exchange, is home for a few days.

The temperature on Sunday morning reached the high point of 90 in the shade.

Threshing of crops in the district is rapidly nearing completion. Most grain has come through the winter well and is grading slightly better than that marketed last fall.

Look at your address label!
